NATURAL BURIAL WOODS

We are passionate about providing families and individuals with natural, eco/green and affordable options, which is why we have heavily invested in creating a natural burial ground. Our ethos is to ensure the woods flourishes for years to come and that it continues to be a natural, beautiful and peaceful place to remember a loved one.

So to ensure the woods is protected and kept as nature intended, we do not allow headstones on graves but encourage a tree to be planted instead as a memorial or a small natural slate with simple inscription. We will also be offering natural memorials, bird boxes, bat boxes and bug hotels which can also have a simple inscription. We also do not allow any plastic flowers or anything unnatural in the coffin, casket or on top of the grave.

In order to ensure that what is buried in our woods meets our ethos of being 100% natural and combustible, you can currently only use our funeral directing services. AJB Funerals is an awarding winning, independent and family run funeral directors, Aaron Bewley and the Team will take you through all the options available to you, and still encourage families to actively take part in not only organising of the funeral but where possible, take as much part on the day of the funeral if they want.

We aim for our costs to be clear and transparent to you beforehand and are committed to providing affordable funerals that suit your budget.
